

Message for Harrison School community

Monday 10 September 2018

Dear parents and carers,

Today's update will be brief. While WorkSafe's investigation of the source of the material continues, the Education Directorate is developing a remediation plan for the site, with the advice of WorkSafe and the licensed asbestos assessor.

I can assure you this will be carried out by licensed asbestos removalists with the safety of students and staff as our main priority and will be shared with the community when finalised.

I also would like to let you know that Education Support Office staff and WorkSafe ACT representatives have been invited to this Wednesday night's P&C meeting to answer any outstanding questions you may have. As I've mentioned before, I'm always happy to receive questions as well.

Thank you all for your patience, support and continued commitment to our wonderful school.

Regards,

Jason
